

# COMPANY PROFILE

## SCOPE OF SERVICES

**Programming and Architectural Design:** Complete Architectural Services from Programming to Construction Administration

**Presentation Drawings and Renderings:** Production of 2-D presentation drawings, 3-D renderings and animations used for design communication.

**Construction Drawings:** Production of Construction Drawings typically used for bidding and administration of a Construction Contract.

**Project Manuals:** Production of Project Manuals including Bidding Requirements, Contracting Requirements and Technical Specifications. Project Manuals are prepared by our Principal Architect, Sujoy Dhar, who is a "Certified Construction Specifier", certified by the Construction Specifications Institute (CSI), USA.

**Quality Control:** Independent review of the Construction Drawings to identify contradictions and ambiguities, thereby enhancing consistency within the documents and minimizing subsequent change orders during the construction phase.

**Revit Architectural Modeling:** 3D Architectural modeling in Revit for production of construction drawings and for clash detection by general contractors.

## ADVANTAGES OF USING OUR SERVICES

**Diversified Experience:** Conversant in varied Project categories such as commercial, medical, institutional, industrial, food service and residential.

**Joint Venture:** Since Architects Integrated PLLC is a Minority and Woman owned Business Enterprise, teaming up with our organization brings the distinct advantage towards securing government projects with minority subcontracting goals.

**Quality Assurance:** Work is produced under the direct supervision of two Principal Architects.
